

Interna UK has been part of the furnishing works for the Thames City complex, London's most recent luxury residential project, a hub of style within the heart of the most coveted new development in the city.

The scope of work of Interna included fix and loose furniture for the shared areas such as the Lobby, the Library, the Spa, the private Cinema, and the magnificent Lounge 39, the sky lounge located on level 39, the top of the building. Sofas, armchairs, lounge chairs and banquettes, tables, consoles, desks and coffee tables, casegoods and cupboards and even a fireplace, have all been produced by Interna with the most refined stones, metals and wood essences.
